

Northcentral Technical College collaborated with the Wausau Area Builders Association to offer a Build My Future Day hosted on the Northcentral Technical College farm in Wausau, WI.

As part of the event, several different agricultural experiences were offered for students including discussion around proper care for our soil through the use of a soil pit with students operating equipment from tractors to excavators to dig the soil pits.

Students also had the opportunity to tour the Northcentral Technical College robotic milking barn and robotic feeding operation.
